

ONCOLOGY EXPERTISE

LEADING THE WAY IN Oncology Clinical Research

At Ergomed, oncology is more than a focus—it’s our core expertise and passion. As an **oncology specialized Clinical Research Organization (CRO)**, we are dedicated to driving and advancing cancer drug development, with a proven track record of managing complex and demanding oncology studies across the globe.

CASE STUDIES

Locally Advanced (LA) Squamous Cell Head & Neck Carcinoma study

- 928 phase III study randomized subjects
- 120+ sites in North America, Europe, Asia
- 3 years enrollment period

Patient-Centric Approach to Enhance Quality of Life

We recognize the profound psychological and social impact of Head and Neck cancer on patients and their caregivers. Ergomed is committed to providing comprehensive supportive care, focusing on patient centricity and engagement. We collaborate closely with our patient engagement team and valued partners, such as the Head and Neck Cancer Alliance, to support patients and their caregivers in every possible way.

DRIVING COMPLEX ONCOLOGY TRIALS Experts in Head and Neck Cancer

Our deep expertise in oncology sets us apart, particularly in the management of challenging cancer types such as **Head and Neck cancer**. With a proven track record in successfully managing Head and Neck cancer trials, we excel not only in the medical aspects but across all functions of trial management. Our team of experts regularly attends leading oncology-focused conferences, including ASCO, ESMO, ECHNO, ESTRO, AHNS, and ICHNO, where we present our study findings and contribute to the global dialogue on cancer treatment. Our comprehensive experience and commitment to staying at the forefront of medical advancements ensure the highest standards of execution from start to finish, consistently delivering positive outcomes for our clients and advancing treatments for patients.

12 studies focusing on Head and Neck Cancer

- Phase I: 1 study
- Phase I/II: 2 studies
- Phase II: 3 studies
- Phase III: 3 studies
- Phase IV: 3 studies

Managed studies with patient numbers ranging from 1 to 928, totaling **over 2000 patients** across multiple trials.

North America, Europe, APAC, and MENA regions

Ergomed’s Head and Neck cancer experience includes all disease stages, from locally advanced to recurrent/metastatic, and all study Phases. We understand the unique challenges posed by each stage and have successfully managed complex Early Phase I (FIH) studies, Phase I/II, and Phase II trials, as well as large Phase III HNSCC trials, spanning the US, Europe, and Asia.

In the last year alone, we have managed seven Head and Neck cancer trials, with five still ongoing. Our comprehensive network of Key Opinion Leaders (KOLs) in critical regions further strengthens our ability to develop the best strategy and deliver successful outcomes.

Oncology Expertise, Ergo, Deep Understanding

Partner with Ergomed for your oncology trials, and benefit from our unparalleled expertise. Our strategic oncology team including medical, scientific and operational experts will provide you full attention, best solutions and a relentless commitment to improving patient outcomes. **With Ergomed, your study is in expert hands.**
