

Precision in Oncology, Excellence in Execution

Accelerating Clinical Trials with Strategic Excellence

Discover how our strategic approach guarantees success in complex clinical trials. With a relentless focus on **precision, persistence, and partnership**, Ergomed ensures your study's triumph.

Phase II study

An Open Label, Randomised Phase 2 Study to Evaluate the Safety and Efficacy of a Combination Therapy Administered in TKI Naive Participants with Previously Treated Advanced Hepatocellular Carcinoma (HCC) and Hepatitis B or Hepatitis C Virus

Compound: Small activating RNA (saRNA) in combination with Sorafenib

Challenge

In the high-stakes arena of oncology clinical trials, demonstrating the safety and efficacy of new combination therapies is crucial. This Phase 2 study targeted TKI naive participants with advanced hepatocellular carcinoma (HCC) and viral hepatitis, aiming to enroll 150 patients across 60 international sites. The challenge? Stringent inclusion criteria and fierce competition for patient recruitment.

Ergomed Solution: Precision and Persistence

Ergomed Clinical Research rises to this challenge with a unique blend of precision and persistence:

- **Global Reach, Personal Touch:** We connected with over 500 investigators worldwide, leveraging personal telephone outreach to build strong, collaborative relationships.
- **Strategic Site Selection:** Our feasibility staff and medical monitors worked in seamless coordination to optimize site selection, ensuring compliance with rigorous study requirements.
- **Relentless Dedication:** Our commitment to excellence ensured that every site and investigator was fully engaged and aligned with study goals.

Results

Our strategic approach yielded impressive results, securing 60 high-quality trial sites through an extensive network and a rigorous selection process.

Additionally, we established and sustained robust partnerships with key investigators, ensuring their unwavering commitment and engagement throughout the study.

Therapeutic Expertise, Ergo, Informed Trial Strategies

At Ergomed, we don't just run clinical trials - we redefine them. With our industry expertise, cutting-edge solutions, and unwavering commitment to patient-centered research, we empower clients to achieve success in even the most complex studies.

Let's build the future of clinical research, together.
